

AKASH DIVATE

Gokak, Belagavi, Karnataka • +91-8431996751 • divateakash21@gmail.com

[LinkedIn](#) • [GitHub](#) • [LeetCode](#)

Summary

- Information Science student (Graduating Jul 2026) with hands-on experience in full-stack development using React, Node.js, and MongoDB, and strong understanding of SDLC, Agile methodologies, API design, and version control.
- Built scalable applications, including a government-funded (5L) healthcare platform. Solved 400+ DSA problems across LeetCode, Codeforces, and GFG.

Education

Mangalore Institute of Technology and Engineering

B.E. in Information Science and Engineering

Nov 2022 – Jul 2026 (Expected)

CGPA: 8.33/10

KLE C S Angadi PU College

Achieved KCET rank: 25484

Jun 2020 – Mar 2022

Distinction: 85.1%

Technical Skills

- Languages:** C++, JavaScript
- Backend:** Node.js, Express.js, REST APIs, Microservices, JWT Authentication
- Frontend:** React.js, React Native
- Databases:** MySQL, MongoDB
- Tools & DevOps:** Git, GitHub, Figma, Postman
- Core CS:** OOP, DSA, Low-Level Design (LLD)

Experience

Open Source Contributor

GirlScript Summer of Code (GSSoC '24)

Mar 2024 – May 2024

Remote

- Contributed to a MERN stack note-taking platform used by 1,000+ users by implementing features, fixing bugs, and improving code quality.
- Developed a voice-to-text note creation module using Web Speech API with smooth cross-browser support.
- Collaborated through GitHub pull requests, participating in code reviews and following Agile + SDLC workflows.
- Used Git branching workflows to ensure clean commits, reliable builds, and production-ready code.

Projects

AirPulse — Govt. Funded Healthcare Platform (5L) — React Native, Node.js, MongoDB

[\[Repo\]](#)

- Cross-platform mobile app for analyzing lung and heart sounds using AI/ML.
- Developed secure REST APIs with JWT-based authentication for patient data.
- Added Bluetooth integration for capturing real-time stethoscope audio.

Vegy — Food Delivery Platform — React.js, Node.js, MongoDB, Stripe

[\[Website\]](#)

- Developed a multi-role ordering system improving order kitchen workflows.
- Integrated secure Stripe payments for seamless checkout.
- Built analytics dashboards for insights into orders and revenue.

CommitStory — GitHub Activity Tracker — React.js, Node.js, Chart.js

[\[Website\]](#)

- Built a tool to track and visualize GitHub contribution activity.
- Fetches live data using GitHub REST API for commits and repositories.
- Created charts heatmaps to present contribution patterns clearly.

Achievements & Certifications

- Winner of the National Ideathon (NAIN 2.0), securing 5L government funding for proposing and developing an innovative healthcare solution aimed at improving early-stage detection of cardiopulmonary conditions.
- Earned the Postman API Fundamentals Student Expert certification at NITK by completing hands-on challenges focused on API design, testing, documentation, and real-world workflow integration.
- Solved over 400 Data Structures and Algorithms problems across LeetCode, Codeforces, and GFG, strengthening problem-solving skills, code optimization ability, and competitive programming fundamentals.
- Achieved a LeetCode Rating of 1397 and a Codeforces Rating of 767, demonstrating consistent participation in contests and continuous improvement in algorithmic thinking.
- Secured 2nd Place in a C Programming Project Competition by building a structured, efficient, and well-documented project under strict evaluation criteria.
- Ranked among the Top 13 teams at the Eduvitality Hackathon conducted by IEEE RVCE, Bangalore, by presenting a robust prototype and showcasing strong teamwork under time constraints.
- Conducted and organized coding competitions and Git/GitHub workshops for 100+ students, helping peers strengthen version control practices and collaborative development workflows.

Extracurricular

- Runner-up — Inter-Branch Variety Competition.
- Winner — Arduino Circuit Design Challenge.
